Atlas NEWS Volume I 2009

Safety and Project News !!!

Dear Valued Customer,

Atlas Industrial Contractors has achieved approved status with three of the four top safety clearing houses in the USA: IS Network (serving customers such as Valero Energy and Georgia Pacific), PICS (Square D and Conoco Phillips), and PEC/Premier (BP and Marathon). We are currently in process with the fourth, Browz (Fluor and Holcim Cement). These registrations are the result of successfully completing intensive qualification processes. They illustrate the absolute safety commitment of Atlas, from the highest levels of the company on down.

On the project side of things, Atlas is in the midst of two large and complex structural steel projects: Nationwide Children's Hospital in Columbus, OH, with Turner Construction as the CM; and Miami Valley Hospital in Dayton, OH; with Skanska/Shook as the CM. Each of these projects consist of over 3,500 tons of beams, girders, and trusses. These are the most current examples of the capabilities of Atlas' structural steel division.
